ADDENDUM NO. 2

Waterline Alterations IFB No. 1095

TO ALL PROSPECTIVE BIDDERS:

The purpose of this Addendum is to make changes to the Invitation For Bid (IFB) 1095 as follows:

1. The vacant corner field next to the work site has been sold by the School District to a buyer and is not available for use unless you obtain approval from owner.
2. The alignments of SFWD 6 feet and 8 feet diameter water pipes were noted physically in the field as observed by the above ground manhole structures (parallel to the fencelines). Reference was made to SFWD weight restrictions for work near their large water pipes in the packet.
3. To City's knowledge (based on the packet), there are no other known utilities in the anticipated work area except for the circular irrigation valve box which has been abandoned in place and can be removed as part of the waterline work if it becomes in conflict. Of course, you must contact USA (underground service alert) as part of doing the waterline work.
4. Pomeroy School has Spring Break during the week of April 17 to 21.
5. Only City water personnel are allowed to operate the water valves.
6. The Public Works Inspector will be determined and the contractor will be notified prior to the start of work.
7. The waterline work should occur within the nonpaved surface (dirt area) as observed in the field using the record drawing of the existing water line and drawing of the new water line.
8. Question: Would swabbing be an acceptable method of disinfection and testing?
Answer: Swabbing with hypochlorite solution and flushing will be an acceptable method in this situation. Leakage test will consist of a visual check for leaks.
9. Attendance: Preston, San Jose Water, Bianchi, Talus, Casey

This Addendum No. 2 is hereby incorporated and made part of the IFB 1095 for "Waterline Alterations". All other provisions of the documents and specifications shall remain in full force and effect.

Date

Chris Schroeder, Purchasing Agent
